## PRODUCT & TECHNICAL SUPPORT SPECIALIST | AI, WEB & SOFTWARE PRODUCTS

Winnipeg, MB, Canada | 204-962-8872 | nelsontsavnande@gmail.com  
savvstudio.com | github.com/savvops | linkedin.com/in/nelson-tsavnande-94381a2b4

### PROFESSIONAL PROFILE

Product support and technical operations professional with 3+ years building and supporting web, AI automation, browser, and workflow products for business clients, plus high-volume customer support through phone, email, chat, CRM, and ticketing workflows. Combines hands-on product development with structured troubleshooting, clear technical writing, careful escalation, and a customer-first approach. Owns issues through resolution, turns recurring questions into better documentation and workflows, and translates user feedback into practical product improvements. Remote-ready in CST.

### PRODUCT SUPPORT STRENGTHS

**B2B client and product support** | **Technical issue triage and escalation** | Email, chat, and phone support | CRM and ticket workflows | **Bug reproduction and root-cause isolation** | **Product feedback and feature requests** | Knowledge-base and process documentation | QA and beta testing | Web, e-commerce, and online-ordering workflows | Cross-functional communication | High-volume prioritization | Customer empathy and ownership

### SELECTED PRODUCT BUILDS

**Nerdbot - Multi-Provider Browser AI Assistant** | *Published Chrome side-panel extension* | *React, TypeScript, Vite, Chrome Manifest V3*

- Built a user-facing assistant that connects Gemini, OpenAI, OpenRouter, Anthropic, Ollama, and LM Studio through one provider-selection layer with streaming chat and local settings.
- Designed active-page text, selected-content, screenshot, and multi-tab context workflows with explicit privacy controls; troubleshoot provider configuration, browser permissions, context capture, and integration behaviour.

**SavvOps / SAO - Agent Command Plane** | *TypeScript, JavaScript, Python, n8n, Telegram, APIs, browser tools*

- Built a Telegram-controlled environment that routes user goals to AI workers and connects model providers, automation workflows, browser tools, local files, processes, schedules, and health checks through consistent commands.
- Designed supportability into the product through durable job state, bounded retries, input requests, execution ledgers, independent verification, clear failure paths, and human approval boundaries.

**HtmlToMp4 Pro - Desktop and CLI Product** | *Electron, JavaScript, Puppeteer, FFmpeg, webhooks*

- Built a desktop and command-line product that converts HTML/CSS/JavaScript animations into MP4/WebM and designed webhook-based licensing and activation workflows.
- Worked across UI, browser rendering, media conversion, configuration, licensing, and activation layers to isolate issues and improve the end-to-end user workflow.

### TECHNICAL TOOLKIT

TypeScript, JavaScript, Python, React, Astro, Node.js, HTML/CSS, Electron, Chrome Manifest V3, REST APIs, webhooks, OAuth-connected tools, SQL basics, Playwright, Puppeteer, Git/GitHub, n8n, OpenAI, Anthropic, Gemini, OpenRouter, Ollama, LM Studio, Microsoft Office, Excel, data cleanup, browser tools, Linux/WSL, Docker basics

## PROFESSIONAL EXPERIENCE

### Founder, Product Builder & Technical Support Lead | Savv Studio / SavvOps

Remote | January 2023 - Present

- Own discovery, product delivery, testing, documentation, and post-launch support for websites, AI automations, browser products, desktop tools, API integrations, and workflow systems used by small businesses and nonprofit clients.
- Act as the first line of technical support for business accounts, troubleshooting websites, forms, user access, browser behaviour, integrations, customer data, and workflow configuration while keeping clients updated through resolution.
- Translate unclear reports into reproducible steps, requirements, technical options, and prioritized fixes; document decisions and explain complex systems in plain language.
- Use recurring questions and client feedback to improve service pages, intake forms, calls to action, online-ordering journeys, editing dashboards, and support handoffs.

### Customer Technical Support & Operations Representative | IntouchCX

Remote / Winnipeg, MB | March 2025 - May 2026

- Supported assigned client programs through chat and phone in a high-volume, process-driven remote environment while managing competing requests with empathy and attention to service quality.
- Used CRM and ticket workflows, documented troubleshooting and customer context, followed operating procedures, and escalated unresolved issues through defined paths.
- Explained solutions and next steps clearly, recognized issues requiring escalation, and supplied useful details so follow-up teams could move cases toward resolution.

### Contract Web Developer & Seasonal Operations Support | Window Guys Winnipeg

Winnipeg / Remote | Seasonal contracts, 2024 - Present

- Support website delivery, lead-generation and quote-request workflows, customer and sales data cleanup, and repeatable updates for a local service business.
- Maintain clearer service paths and customer-facing information while resolving web and workflow issues that affect inquiries and operational follow-up.

### Customer Service Representative - Lyft Support | 24/7 Intouch

Winnipeg, MB | November 2017 - April 2019

- Resolved rider and driver inquiries through email and phone in a high-volume support environment, following service-quality and escalation procedures.
- Recorded issues, actions, and outcomes accurately so customers received consistent follow-up across support interactions.

## EDUCATION

**Bachelor of Science in Mathematics and Physics** | University of Manitoba, Winnipeg, MB | May 2023

**Relevant study:** data analysis, statistics, linear algebra, computational programming/Python, and mathematical modelling
