Technical Support / SaaS Implementation Specialist

Summary

I combine remote customer-support experience with hands-on knowledge of web applications, browser products, APIs, and AI automation. At IntouchCX and 24/7 Intouch, I worked through chat, phone, ticketing, escalation, and quality processes. Through Savv Studio / SavvOps, I build and troubleshoot websites, browser extensions, automation workflows, and customer-facing intake systems. I am a strong fit for technical support, product support, SaaS implementation, onboarding, and technical customer-success roles.

Skills

- **Support operations:** chat and phone support, CRM/ticket workflows, escalation, documentation, remote work, process and quality requirements.
- **Troubleshooting:** browser and web applications, forms, account and workflow issues, reproduction steps, user communication, issue handoff.
- **Implementation:** requirements discovery, onboarding, configuration, APIs/webhooks concepts, testing, walkthroughs, and support documentation.
- **AI and automation:** n8n, Telegram bots, LLM workflows, prompt design, model routing, human review gates.
- **Web and data:** Astro, HTML/CSS, JavaScript/TypeScript, Cloudflare Pages, Git/GitHub, Excel, Python scripting, SQL basics.

Experience

Customer Technical Support & Operations Representative — IntouchCX

Remote / Winnipeg, MB | March 2025 – May 2026

- Supported assigned client programs through chat, phone, CRM/ticket workflows, escalation paths, and quality requirements.
- Resolved customer issues using clear written communication, process discipline, and structured troubleshooting.
- Followed documented procedures while recognizing when an issue required escalation or additional investigation.
- Role ended when the client program shut down; available immediately.

Founder & Lead Developer — Savv Studio / SavvOps

Remote | January 2023 – Present

- Build and support customer-facing websites, browser tools, AI automations, and internal workflows.
- Turn user and business requirements into configured systems, implementation steps, tests, and clear operating instructions.
- Troubleshoot browser behavior, deployment, forms, integrations, content, and workflow-state problems across local and cloud environments.

Contract Web Developer & Seasonal Operations Support — Window Guys Winnipeg

Winnipeg / Remote | Seasonal contracts, 2024 – Present

- Supported website, lead-generation, customer-service, sales, data-cleanup, and seasonal field operations.
- Improved customer-facing information and quote-request paths for a local service business.

Customer Service Representative — 24/7 Intouch, Lyft Support

Winnipeg, MB | November 2017 – April 2019

- Resolved rider and driver inquiries through email and phone while following escalation and service-quality procedures.
- Used ticketing and CRM workflows to document issues, communicate next steps, and maintain service consistency.

Selected Technical Work

Nerdbot — Browser AI Assistant (<https://chromewebstore.google.com/detail/nerdbot/oegoeflmcbahliaahlameajidnhlplog>)

- Built a Chrome MV3 side-panel assistant with page context, local settings, chat history, and multiple AI-provider options.

SavvOps Automation

- Built Telegram and n8n workflows for routing tasks, reminders, summaries, health checks, and supervised actions.
- Designed approval and evidence checkpoints so automation stops safely when human input is needed.

Client Websites (<https://savvstudio.com/work>)

- Built and support small-business and nonprofit websites, including Vanity Hair WPG (<https://vanityhairwpg.ca>) and DPTF Foundation.

Education

Bachelor of Science in Mathematics and Physics

University of Manitoba, Winnipeg, MB | May 2023
